DETAILED ACTION

Drawings

1. The drawings were received on December 21, 2007. These drawings are approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 37-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Marin et al (Pat Num 5,281,757, herein referred to as Marin). Marin discloses an electrical cable (Figs 1-2) that is capable of protecting the cable from the ingress of water (Col 1, lines 10-14). Specifically, with respect to claim 37, Marin discloses an electrical cable (Fig 1) comprising a conductor (5), a thermoplastic insulating layer (8) radially external to the conductor (5), at least one expanded polymeric layer (10) around an insulating layer (8), a circumferentially closed metal shield (3) around the expanded polymeric insulation layer (10), and an impact protecting element (11 & 12) in a position radially external to the metal shield (3), wherein the impact protecting element (11 & 12) comprises at least one non-expanded polymeric layer (12) surrounding the metal shield

(5) and at least one expanded polymeric layer (11) is radially internal to the non expanded polymeric layer (11, Fig 1). With respect to claim 38, Belli discloses that the expanded layer (11) is 1-2 times the thickness of the non expanded layer (12, Fig 1).

Response to Arguments

4. Applicant's arguments with respect to claims 37-38 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

5. Claims 20-36 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: This invention deals with a process of manufacturing an electrical cable comprising a process for manufacturing an electric cable, comprising the steps of: feeding a conductor at a predetermined feeding speed; extruding a thermoplastic insulating layer in a position radially external to the conductor; cooling the extruded insulating layer; forming a circumferentially closed metal shield around said extruded insulating layer; the time occurring between the end of the cooling step and the beginning of the shield forming step being inversely proportional to the feeding speed of the conductor (claim 20).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
